69. Submitting report relative to Police Surveillance and Facial Recognition Technology. **(Even identifying an accurate and clear understanding of how facial recognition technology actually works is much more difficult than might be expected. The technology has multiple formats and is used for many other things besides law enforcement investigations. One scientific source generically describes the function as follows: “Facial recognition is an advanced technology that helps in discerning and identifying human faces from an image or video. A system employed to perform facial recognition uses biometrics to map facial features from the photo or video. It compares this information with a large database of recorded faces to find a correct match.”)**
